

We are planning and consulting engineers in the fields of water management, urban hydraulic engineering, hydropower and environmental management with our head office in Innsbruck. Our project locations are mainly abroad, sometimes in quite "exotic" countries. Our website www.pap.co.at gives a good overview.

We are searching for a

CIVIL DRAFTER (f/m/x) – FULL TIME

THAT

- is fascinated by the medium of water
- is happy when we bring people a secure water supply, or
- get their river clean again through our sewage treatment plant, or
- improve their electricity supply, or
- make their infrastructure more climate resilient, and
- finds working in and for foreign cultures interesting

YOUR FUTURE

- Integration into a dynamic and collaborative team;
- Development of technical and social skills;
- Further development to become a project engineer or project manager, depending on the training you have completed.

YOUR PROFILE

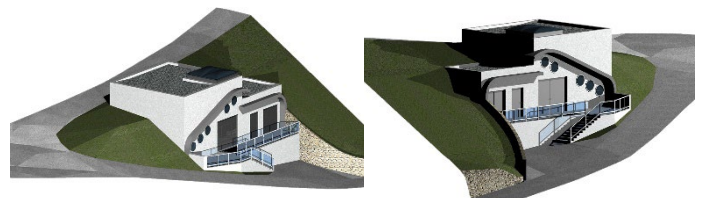

- Civil engineering draftsman, HTL graduate, or UNI student of civil engineering or architecture
- Very good CAD skills (AutoCAD, Civil3D, QGIS), Revit advantageous
- Independent and self-reliant work
- Good written and spoken English/German

YOUR CHALLENGE

- Support in the preparation of concepts, feasibility studies, planning and tenders
- Preparation of concept, tender and design plans in 2D and 3D
- Graphic computer animation
- Preparation of GIS plans and databases
- Hydraulic calculations with the help of different software

WE OFFER

- Flexible working hours
- Varied, challenging work
- Independent work
- Flat hierarchy
- Teambuilding events
- Good working atmosphere
- Performance-related remuneration via TB-Kollektiv

ARE YOU INTERESTED?
